ABOUT US

We lend our learning and expertise in providing integrated sustainable water, environmental and social solutions for large industrial core sectors, who source process raw material from open environment along with other institutional and community stakeholders. We help FMCG, Water Intensive processes, Paper & Pulp, Textile, Mining and Pharma sectors in undertaking scientific and technical impact assessments, analyzing and planning for mitigating issues and concerns for ensuring operations sustainability and expansion promotion. We are also specialized in developing strategic CSR/business social responsibility planning, execution, evaluating, assessing impact of industry social performance and reporting. In this process, we build stakeholder value, partnerships convergence and linkages for sustainability.

Our Vision

Be a respectable partner in promoting effective and integrated sustainable solutions for business and community through continuous learning and setting benchmarks in consulting excellence.

Our Mission

We offer strategic support and develop processes to facilitate integrated sustainable water, environmental and social solutions for business and community, customized to meet client specific needs and challenges by offering exceptional quality and newer stakeholder value.

What we do ?

We are an integrator... Today's business need solutions not in isolation but in integration, meeting operational and business goals on a sustainable basis. We focus on sustainability at each process. We develop, build strategic models and solutions for sustainable business processes.

- ▶ **Integrated Water Resource Management Services**
- ▶ **Integrated Environmental Management Services**
- ▶ **Integrated Social Performance and Risk Management**

What makes us unique ?

Our approach is integrated, customized and provides sustainable solutions in meeting client water needs.

- ▶ **We integrate Water related assessments by developing source specific hydrogeological /watershed to assess Environmental, Water, Social /Community related concerns/challenges.**
- ▶ **Our onsite/primary water impact assessments deals with water source to process, discharge and disposal – we help you have water balance and water audits.**
- ▶ **We develop integrated mitigation plans and provide support to execute and measure performance of each process.**
- ▶ **We work extensively with global multinational clients in above areas.**

With whom we work ?

We also work with business that draw raw materials from open environment. Business that have to interface with stakeholders such as communities and other competing users. Business processes that often collaborate with civil society institutions, regulators and media.

- ▶ **Water-intensive industries, Beverages, Breweries and FMCCG sector**
- ▶ **Paper and pulp and Mining**
- ▶ **Textiles and Pharma sector**
- ▶ **Food Processing sector**

What we offer ?

We offer integrated water solutions in following areas of Sustainable Business :

- ▶ **Comprehensive, integrated Ground and Surface water assessments**
- ▶ **We promote water source protection and sustainable Water Resources Management practices**
- ▶ **We optimize Greenbelt and provide wastewater management solutions**
- ▶ **Environmental Assessments and studies to manage issues of contaminations**
- ▶ **Regulatory and Environmental Compliance Management services**
- ▶ **We help manage and mitigate social and community through - Strategic CSR and Social Performance Management.**

Our value proposition

- ▶ **We provide critical business value through integration to improve sustainable performance of key business processes**
- ▶ **We recognize the importance of being open to new ideas and ways of doing things.**
- ▶ **Actively engage stakeholder consultations to improve processes, systems, mechanisms for optimizing quality.**
- ▶ **Contribute to a healthy environment by minimizing ecological footprint at all stages in our work.**
